

You will end up on the freeway “Lazero Cardenas” although it isn’t marked as such.

As soon as you enter onto the Lazero Cardenas note you mileage and move to the center lane. You will be getting off in about 2 miles.

At about 1.5 miles move to the right lane and begin watching for the sign that says the **CALZ GOB Curiel 1 ½ Kilometers**

Take the immediate next exit to the right after you pass this sign. It is only about ½ kilometer, or less, to that exit and it is not marked with any other signs.

You actually have to proceed down the side road the additional 1 kilometer to the overhead intersection.

Once on the feeder road, stay to the left and turn left at this intersection (shown on the right).

You are passing under the Lazero Cardenas and you will go exactly 1 mile to the Rastro that will be on the right.

But stay in the center lane.

Watch the lights and street signs as you proceed down the road.....

- Stop light – Calle #1
- Stop light – Calle #3
- Stop light – Calle #30

After this light the center lane becomes the right lane because cars are allowed to park in the right lane from this point on.

Stop light – Calle #34

Watch for the El Pollo Pepe chicken restaurant on the right. The meat market is on the right immediately after this restaurant.

This is what you will see on your right.

Turn in and find a parking spot. But note that you will have to turn around in this small lot and go back out the same way you came in.

You should consider buying from the first shop as you enter because they do have coolers to store meat when not being cut.

Now going to the local fish market from here.....

Before leaving this veal market lot, look directly across the street. You will see a street on the other side of the boulevard that you must take (about 1-2 o'clock from where you are standing).

When you exit this lot, you have to turn right.

Get directly across to the inside lane immediately and take the "turn around" on your left.

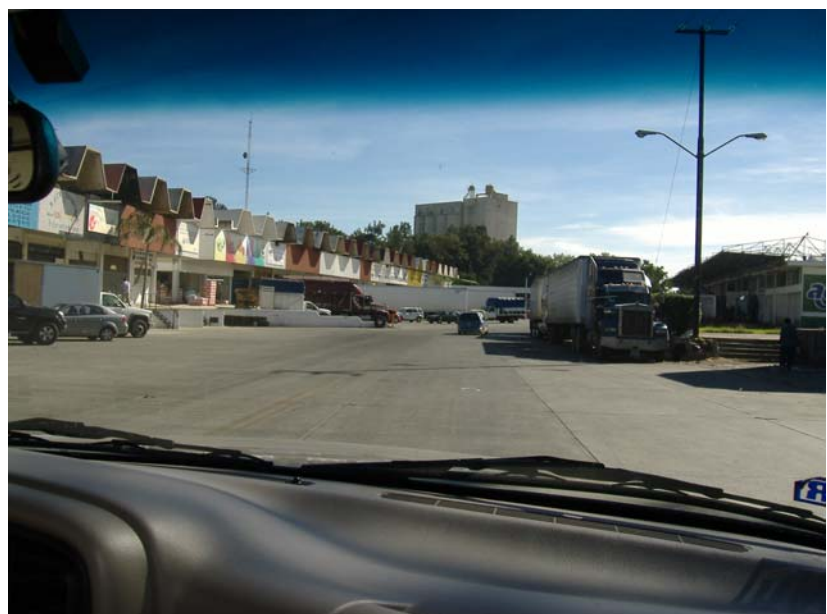

When you turn around and go the other way, get immediately across to the right lane.

You will see two exits.....the first is to a private lot with a cross arm and you can't take it.

Take the immediate next street off to the right.....across from the veal market.

You are going to go down a wide street, sometimes lined with semi tractor trailers.

Continue winding your way down this road as it continues back and to the right.

Once under the underpass look for this on the right and turn in.

If possible, you should try to park along this small street. Look for someone to help you find a spot.

If there aren't any spots, look straight ahead and to your left. You will see a multi level open parking garage (blue building).

The first sets of stalls on the right and left of this street are products (baking, paper, plastic, spices, candies, etc.)

About midway down this set of buildings is an open walkway back to the next sets of buildings that house all the cheeses, meats, vegetables, restaurants, etc.
